

## File Handling Assignment

Download the xml file from the following link –

<https://drive.google.com/uc?export=download&id=1LFhE-darndrLLdJPdwpXwWS5GCSXB7IB>

Create a table in database with the following fields –

- Id
- Title
- Description
- Location

Read the above fields from the downloaded xml file and save them to the database using Entity framework

Logic hint:

Use readline and keep looking for <feeds> in a loop, once found the first four lines after <feeds> contains the data you are looking for. Only the data part of the above mentioned tags should be saved to database.
